Brigid,

The R3 portion of the PFAS database is up to date. For convenience, I attached a table containing the R3 data in a table similar to the one in your original email. Please note:

- Site Assessment sites are indicated with an "N" in the "NPL or Non-NPL Status" field.
- Shepards Field ANG and Chemours are on the R3 list but are overseen by R3's Water Division. They are non-NPL.
- The request included fields for County and Zip Code. I do not have this info at this time since it's not in the database. I could add it in the future if needed.

Please let me know if you have any questions.

Regional Superfund Division Directors

Updating the list of NPL and SAA sites where PFAS has been detected was one of those items that was due during the shutdown. We want to get the update back on track, but we recognize that there are many other pressing actions. If at all possible, we would like to get your edits to the list by February 28th. If you need more time, please have your contact reach out to Linda Gaines (gaines.linda@epa.gov). I know some regions have been updating. The attached list is the original I sent on 12/12/18. In addition, we will be coordinating with OEM on the removal site list they have.

Thanks in advance. Have a great weekend.

Brigid Lowery | Director | Assessment and Remediation Division (ARD)

Regional Superfund Division Directors

Attached please find the current list of NPL and SAA sites that we are aware of where PFAS has been detected. I'm sure many of you are aware that regions provide information on PFAS contaminated sites to HQ through an existing HQ sharepoint site – PFAS Site Information. Periodically, HQ is asked to provide summary statistics from this data for congressional hearings, Administration talking points, press inquiries, FOIAs, etc. Providing accurate and updated information is critical. To ensure that everyone is operating under the same assumptions when the data are entered, Linda Gaines will be discussing this list at tomorrow's monthly PFAS regional coordination call and requesting regions make any necessary updates by Jan. 18, 2019. We would appreciate your review of the results before it is submitted to HQ.

OSRTI is collaborating with FFRRO on this effort. If you have any questions, feel free to contact me, or John Burchette for federal facilities questions.

Thanks for your assistance.
